# About the Editors

---

## **Surendra Kumar Chandniha, PhD, PD**

*Assistant Professor/Scientist, Department of Soil and Water Engineering, BRSM College of Agricultural Engineering and Technology & Research Station, IGKV, Mungeli, Chhattisgarh, India*

Surendra Kumar Chandniha, PhD, is Assistant Professor/Scientist in the Department of Soil and Water Engineering at BRSM College of Agricultural Engineering and Technology and Research Station, Mungeli, India. Dr. Chandniha has more than nine years of experience in the field of water resources, surface water hydrology, soil and water engineering, and climate change. He has published more than 65 research papers in peer-reviewed journals as well as book chapters. He has done quality research work at IIT Roorkee and NIH Roorkee and has received several national and international awards in the water sectors area. Dr. Chandniha has delivered expert talks and invited lectures in offline and online modes at government organizations throughout India. He has supervised students of the MTech and BTech programs in agricultural engineering. He is a member of several professional organizations, including The Institute of Engineers, India; Indian Association of Hydrologists, Indian Water Resources Society, Association of Agrometeorologists, and American Society of Civil Engineering. And he is an editorial board member of the journal Hydrology.

Dr. Chandniha acquired his BTech (Agricultural Engineering), MTech (Soil and Water Engineering), from Indira Gandhi Krishi Vishwavidyalaya, Raipur, Chhattisgarh, India, and PhD (Water Resources Development and Management) from the Indian Institute of Technology (IIT), Roorkee, India. In the year 2016, he was awarded the Best Water Resources Student Award in IIT, Roorkee, India. He was awarded SERB-National Post Doctoral Fellowship in 2017 and was National Post-Doctoral Fellow and Research Fellow at the National Institute of Hydrology, Roorkee.

**Anil Kumar Lohani, PhD**

*Scientist-G, National Institute of Hydrology, Roorkee, Uttarakhand, India*

Anil Kumar Lohani, PhD, is currently Scientist-G and Head of the Surface Water Hydrology Division at the National Institute of Hydrology, Roorkee, India. Dr. Lohani is Coordinator of the Central India Hydrology Centre of the National Institute of Hydrology, Bhopal, and Head and Coordinator of the Centre for Flood Management Studies, National Institute of Hydrology, Guwahati, India. Dr. Lohani has over 30 years of research experience in surface water hydrological modelling, flood management, decision support system, and soft computing techniques. He has supervised several PhD, postdoctoral, MTech, and BTech students, and is currently Training Coordinator and DSS Coordinator of the National Hydrology Project of the National Institute of Hydrology. Dr. Lohani has completed over 40 international and national funded projects and is continuing work on six projects at present. He has published more than over 225 research papers in international/national journals and conferences as well as books, book chapters, and technical reports. Dr. Lohani is a member of several professional organizations and has received awards for his work. Dr. Lohani has been an expert committee member of various national-level committees and has coordinated and organized more than 100 training programs and conferences.

Dr. Lohani received his BTech from G.B. Pant University of Agricultural & Technology, Pantnagar, Uttarakhand, India; his MTech in Water Resources Development & Management from IIT, Kharagpur, India; and his PhD in Hydrology from IIT, Roorkee, India.

**Gopal Krishan, PhD**

*Scientist-C, National Institute of Hydrology, Roorkee, Uttarakhand, India*

Gopal Krishan, PhD, is Scientist-C at the National Institute of Hydrology, Roorkee, India, and Ex-Researcher–Indo Gangetic Basin, Groundwater Resilience Project, British Geological Survey, United Kingdom and IIRS (ISRO). Dr. Krishan has over 20 years of research experience in hydrological evaluations, surface water and groundwater hydrology project management, and field investigations. He has supervised PhD and other postgraduate students. He has completed several internationally and nationally funded projects and is continuing work on five projects right now. He has published more than 150 research papers in international/national journals, including in *Nature Geoscience*, *Science of Total Environment*, *Geophysical Research Letters*, *Journal of Hydrology*, *Environment Pollution*, *Water*,

*Environmental Earth Sciences*, and *Current Science*. He has also published papers in conferences, along with a book, book chapters, newsletter articles, and technical reports. Dr. Krishan is a member of the Society of Earth Scientists, Indian Association of Hydrologists, International Association of Hydrological Sciences, International Association of Hydro-geologists, Indian Society of Remote Sensing, and American Water Resources Association. Dr. Krishan has been an expert committee member of a national committee constituted by NGT for finalizing groundwater guidelines and has been invited by the Punjab and West Bengal governments for various meetings on hydrological perspective. Dr. Krishan has conducted training courses to officers of various states under the National Hydrology Project and has organized two international conferences.

Dr. Gopal received his PhD in Soil Science and Water Management in 2001.

### **Ajay Krishna Prabhakar, PhD**

*Assistant Professor, Department of Civil Engineering, National Institute of Technology, Kurukshetra, Haryana, India*

Ajay Krishna Prabhakar, PhD, is Assistant Professor in the Department of Civil Engineering, National Institute of Technology Kurukshetra Haryana, India. Dr. Prabhakar has seven years of teaching experience at the National Institute of Technology, Kurukshetra, and research experience in the field of surface water hydrology, planning and management of water resources, drought analysis, and climate change. He has published research papers in peer-reviewed and SCI journals in water resources, groundwater, rainfall trend, climate change. He has supervised MTech and BTech students in civil engineering. He is an active member of National Institute of Technology Kurukshetra Library and faculty in charge of the Technical Society of Civil Engineering Department of NIT Kurukshetra. Dr. Prabhakar is also a member of the Association of Agrometeorologists and American Society of Civil Engineering.

Dr. Ajay Krishna Prabhakar acquired his BTech (Civil Engineering) from Bundelkhand Institute of Engineering and Technology, Jhansi, Uttar Pradesh, India; MTech (Water Resources Development and Management) from Indian Institute of Technology, Roorkee; and PhD (Water Resources Engineering) from National Institute of Technology, Kurukshetra, Haryana, India.

# Contents

---

<i>Contributors</i> .....	<i>xiii</i>
<i>Abbreviations</i> .....	<i>xvii</i>
<i>Preface</i> .....	<i>xxiii</i>
<b>1. Parameter Estimation for Solute Transport through Coupled Stratified Porous Media Using Time-Dependent Dispersion Coefficient.....</b>	<b>1</b>
Deepak Swami, Chandni Thakur, Abhay Guleria, and Nitin Joshi	
<b>2. Wavelet Transform-Based Trend Analysis of Drought Variables over Homogenous Monsoon Regions of India .....</b>	<b>37</b>
Himanshu Sharma, Nitin Joshi, and Shakti Suryavanshi	
<b>3. Quantitative Assessment of Glacier Changes between 1998 and 2011 in the Parvati River Basin, Western Himalaya, India .....</b>	<b>67</b>
Chanchal Gupta, Vikash Shivhare, and Sanjay K. Jain	
<b>4. Soft Computing Technique in the Water Sector: Artificial Neural Network Approach .....</b>	<b>83</b>
Himanshu Panjiar, and Ankit Chakravarti	
<b>5. Computation of Different Parameters in Water Resources Engineering Using Artificial Neural Network .....</b>	<b>117</b>
Ankit Chakravarti, Himanshu Panjiar, and Manish Pandey	
<b>6. Morphometric Assessment of Drainage Basin for Subwatershed Prioritization Based on Land Use Land Cover Using GIS .....</b>	<b>139</b>
Gaurav Kant Nigam, Preeti Rajput, and M. P. Tripathi	
<b>7. Prioritization of Charwa Watershed Based on Morphometric Analysis Using Remote Sensing and Geospatial Techniques .....</b>	<b>165</b>
Ravi Raj, Aman Kumar, Yempali Priyanka, and Pratibha Warwade	
<b>8. A Framework for Integrated Wetland Sustainability Index .....</b>	<b>185</b>
Alka Yadav and M. L. Kansal	

<b>9. Long-Term Trend Analysis of Rainfall Series (1901–2010) over Southern Bihar, India .....</b>	<b>205</b>
Saurabh Suman, Pratibha Warwade, and Priti Kumar	
<b>10. Groundwater Flow Modeling of a Hypothetical Groundwater System .....</b>	<b>227</b>
Sumant Kumar, Ravi K. Saini, and Vinod Kumar	
<b>11. Classification and Change Detection of an Urban Built-Up Area: A Case Study of Gurugram .....</b>	<b>243</b>
Osheen and M. L. Kansa	
<b>12. Hydrological Water Balance Study in Champua Watershed of the Baitarani River Basin Using SWAT Model .....</b>	<b>255</b>
Ajay Krishna Prabhakar, K. K. Singh, Anil Kumar Lohani, and Surendra Kumar Chandniha	
<b>13. Long-Term Rainfall Trend Variability Analysis for Rampur Watershed: A Case Study of Mahanadi River Basin .....</b>	<b>273</b>
Priyanka Gunjan, S. K. Mishra, Anil Kumar Lohani, Surendra Kumar Chandniha, and Nity Tirkey	
<b>14. Estimation of Soil Loss and Sediment Yield Using Universal Soil Loss Equation in Jiadhal Basin of Dhemaji District, Assam .....</b>	<b>295</b>
Arnab Sarma	
<b>15. Climate Change Analysis of Precipitation and Mean Temperature in Jammu and Kashmir, India.....</b>	<b>317</b>
Dheeraj Kumar, Nayan Sharma, and Neeraj Kumar	
<b>16. Modeling 1D–2D Hydrodynamic SWMM Model to Mitigate Flooding and Prioritize Flood-Prone Areas.....</b>	<b>355</b>
Manish Kumar Sinha, Monika Sharma, Klaus Baier, Rafiq Azzam, and Mukesh Kumar Verma	
<b>17. Entropy-Based Measurement of Long-Term Precipitation Variability across India.....</b>	<b>375</b>
Prabhash Kumar Mishra, Hemant Singh, Swagatam Das, and Surendra Kumar Chandniha	
<b>18. Evaluating NOAA and PRISM Precipitation Data in Streamflow Generation Using HAWQS Model .....</b>	<b>393</b>
Vivek Verma, Manish Kumar Sinha, and Triambak Baghel	

<b>19. Hydrogeology, Groundwater Regimes, and Quality Issues in Punjab.....</b>	<b>409</b>
Gopal Krishan, Anoop Nagar, M. L. Angurala, Rakesh Rana, and N. Sudarsan	
<b>20. Data Assimilation in Groundwater Modeling .....</b>	<b>429</b>
Nitesh Patidar and Anjali	
<b>21. Decision Support System for Surface Water Planning.....</b>	<b>443</b>
Anil Kumar Lohani, Rahul Kumar Jaiswal, Surendra Kumar Chandniha, and Sukant Jain	
<b>22. Optimal Multiobjective Multireservoir Operation Using Interactive Decision Making by Parametric Approach.....</b>	<b>465</b>
R. U. Kamodkar, J. B. Gurav, and D. G. Regulwar	
<b>23. Projection of Future Precipitation over Gangotri Glacier at Himalayan Belt Using CMIP5 Climate Model.....</b>	<b>491</b>
Surendra Kumar Chandniha, Manohar Arora, Lalit Pal, Amit Kumar, Pragya Das, and G. K. Das	
<b>24. Flow Pattern around Multiple Vane Arrangement.....</b>	<b>505</b>
Karan Solanki and Himanshu Sharma	
<b><i>Index.....</i></b>	<b>523</b>
